

SHUBHANGI JAIN

Full Stack Developer | Frontend Specialist | Project Lead

+91 6399315490 | shubhangi8117@gmail.com | [linkedin.com/in/shubhangi-jain-58665522b](https://www.linkedin.com/in/shubhangi-jain-58665522b) | shubhangijainportfolio.netlify.app

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1+ year of professional experience designing and developing scalable React.js applications for enterprise and government digital platforms. Expertise in React.js, Redux, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, JWT Authentication, RBAC implementation, and responsive web design. Proven ability to lead frontend initiatives, collaborate cross-functionally with backend and QA teams in Agile/Scrum environments, and deliver user-centric solutions. Strong track record of optimizing application performance, improving load times by 40%, achieving 95%+ component test coverage, and implementing complex features for 50,000+ users.

TECHNICAL SKILLS

Languages & Frontend: JavaScript (ES6+), HTML5, CSS3, React.js, React Hooks, Context API, Redux, TypeScript, JSX, Tailwind CSS, Material UI, Ant Design, Bootstrap

Backend Development: Node.js, Express.js, REST APIs, RESTful web services, API design, API integration, API documentation

Database & ORM: PostgreSQL, SQL, Prisma ORM, database design, query optimization, data modeling

Authentication & Security: JWT Authentication, OAuth, Role-Based Access Control (RBAC), password encryption, secure API endpoints

Tools & Platforms: Git, GitHub, Vite, npm, AWS S3, Docker, Figma, Axios, Postman, Chrome DevTools

Testing & Quality Assurance: Component testing, cross-browser testing, API testing (Postman), manual QA, debugging (Chrome DevTools)

Specializations: Dashboard development, data visualization (Highcharts, Leaflet Maps), PDF generation (jsPDF), ATS systems, responsive design, UI/UX implementation, Agile development, cross-browser compatibility, technical documentation, code review

PROFESSIONAL EXPERIENCE

Software Developer

Austere Systems Limited, New Delhi, India

April 2025 – Present

- Developed and deployed 15+ scalable React.js applications with reusable component architecture, reducing code duplication by 35% and improving maintainability across enterprise projects
- Integrated 20+ REST APIs using Axios and implemented error handling, optimized API calls, reduced application load time by 40%, and achieved 95%+ component test coverage
- Built RESTful APIs using Node.js and Express.js with JWT authentication, PostgreSQL integration, error handling, and comprehensive API documentation for 5+ backend services
- Collaborated with 8+ backend developers, QA engineers, and product managers using Agile methodology (2-week sprints), delivering 100% on-time deliverables and achieving 98% sprint goals
- Enhanced UI/UX responsiveness and accessibility across 50,000+ daily active users; implemented cross-browser compatibility testing achieving 99.2% success rate across Chrome, Firefox, Safari, and Edge
- Implemented Role-Based Access Control (RBAC) system serving 2,000+ government officials with 8 permission levels, improving security compliance and user experience
- Architected reusable, type-safe UI components using React Hooks, Redux, and TypeScript, styled with Tailwind CSS, Material UI, and Ant Design to maintain consistent design systems across 15+ enterprise applications
- Leveraged Docker for containerized development environments and Prisma ORM for efficient database schema management, streamlining development workflows across 5+ backend services
- Collaborated with UI/UX designers via Figma to implement pixel-perfect interfaces and conducted thorough API testing with Postman, ensuring reliable, well-documented endpoints prior to deployment

KEY PROJECTS

GPDP Haryana Portal - Gram Panchayat Development Planning Platform

Project Lead & Frontend Developer

Led end-to-end frontend development and technical architecture for a government-level Gram Panchayat Development Planning platform built with React.js, serving 20,000+ users across Haryana. Architected and implemented the Gram Sabha scheduling system, Minutes of Meeting (MOM) generation module, advanced reporting dashboards with real-time analytics, and multi-level approval workflows. Integrated Highcharts for data visualization, Leaflet Maps for geo-spatial mapping, AWS S3 for secure cloud file storage, Role-Based Access Control (RBAC) for multi-tier security, and jsPDF for automated report generation. Reduced dashboard loading time by 50% through code optimization, lazy loading, and component-level performance tuning.

EdCIL Recruiter Management Portal - ATS System

Frontend Developer

Developed a comprehensive Applicant Tracking System (ATS) using React.js and RESTful APIs, serving 100+ recruiters and 5,000+ candidates. Built recruiter dashboards with real-time candidate analytics, implemented candidate workflow management with drag-and-drop functionality, created advanced reporting interfaces with CSV/PDF export, and established 15+ reusable, responsive UI components. Managed complex API-driven data systems handling 10,000+ records with optimized query performance and pagination for fast data retrieval.

ZEITLOS E-Commerce Platform

Full Stack Developer

Architected and built a premium e-commerce platform using React.js, Node.js, and Express.js with JWT-based authentication, OAuth integration, and OTP-enabled password reset. Designed a relational PostgreSQL database and developed a comprehensive admin dashboard for inventory, order, and transaction management. Implemented real-time analytics tracking 1,000+ daily transactions, an automated inventory management system, and secure payment integration. Optimized database queries, reducing query time by 45%, and implemented caching strategies to improve page load speed.

IdeaHub Social Collaboration Platform

Full Stack Developer

Developed a full-stack social collaboration platform using React.js, Node.js, and Express.js, enabling idea sharing, real-time engagement metrics (likes, comments), bookmarking functionality, and instant notifications. Implemented WebSocket-based real-time updates, optimized the PostgreSQL database for high-concurrency scenarios supporting 500+ concurrent users, and built an activity feed with pagination handling 10,000+ daily interactions.

EDUCATION & TRAINING

B.Tech in Computer Science Engineering

AKTU (Dr. A.P.J. Abdul Kalam Technical University), Lucknow

Java Full Stack Development Certification

QSpiders Technology Institute

July 2024 – March 2025 | Coursework: Core Java, JDBC, Servlets, JSP, Spring Framework, Spring Boot, Hibernate, SQL Database Design, JavaScript ES6+, React.js, REST API Development

CERTIFICATIONS & ACHIEVEMENTS

- Java Full Stack Developer Certification - QSpiders Technology Institute (March 2025)
- Performance Excellence Award - Austere Systems Limited for optimizing dashboard load time by 50% (2025)
- 100% Sprint Goal Achievement - Maintained consistent on-time delivery across 15+ sprints with zero missed deadlines
